

Out of the Matrix. The Key to The ONE. The Secret of Ex-IS-tence. Part 1

The material presented herein is to be read very slowly. Most of it originates from very deep levels of Mind. Pause when you feel the need to do so when something seems a bit obscure, and meditate on it. All we easily reveal itself. It is meant to. The Universal Mind (The IS: Eternal Intelligence-Awareness) always tries to teach its entities of thought about Its reality and their purpose, through the medium of creative inspiration. However if, because of the resistance and creative misconceptions that mankind introduces, the perception is that this cannot be achieved within illusory frameworks of time and space, which defines periods within Creations, then these particular Creations just disappear and are devibrated in the swirling of the real Black Hole of the Mind. We are nearing such a crossroad in this Creation. Most human entities spend their "waking" lives hypnotized by their sensory world, which gives them the illusion of a material reality "out there." In reality, space and time are really nonexistent both at the level of Pure Aware Consciousness, and also at the level of the unaware "blind parts" that experience for It the illusion of creative thought within an illusory space/time construct called Creation. Mankind rarely realizes that life is but a sensory illusion that gives experience and learning to Thought, and that the only reality is Thought Itself, which is forever evolving. Consciousness can be defined as Awareness projected onto a vibratory Dream. Period. For Space/Time Creation it is but pure Dark lesser vibratory (conscious and subconscious) thought interacting more or less intensely with the inner Holographic Light/Thought Reality originating through the facets of The MATRIX ("Deep" of Genesis 1: 2). BEING means BE-IN-God. Not the reverse, which is impossible. Our purpose in life is BE-IN-G, RE-MEMBER-ING, and ultimately EN-JOY-ING the Godliness. To be HAPPY and smile at our inner Higher Self. The only real Space there is, is the mental Space within the DreamSpace (Imag-in-ation) of the Mind of God. The only real Time there is, is the pace of the evolvement of God's Awareness within Its Dream through the media of Vibratory Light, as God projects Its Consciousness onto Its own Vibratory Dream (The Matrix). The Matrix of life is projected and connected to each perceptual individual consciousness through a Thought/Supercomputer (The Matrix) that interacts with its sensory input/output individual computer (brain). The Matrix is really a field of pure information, not energy. It underlies and structures all energetic processes. As such it cannot yet be detected by our instruments. It is really the realm of the mythic ether (implicate realm) that physicists know should exist but has not yet been experimentally detected. Consciousness provides the energy of life. Original Consciousness has an unfathomable number of connections to the General Thought/Supercomputer. Each connection will be projected for a perceptual lifetime into a story/creation thinking that it is a particular character experiencing a particular life, surrounded by particular entities and reality within an illusory space/time Holographic Virtual Reality. The Creation and the individual will be given a certain history of linearly coherent perceptual history and a sense of possible probable futures. All we are is but wonder-ful Holograms of pure light, interfacing with Creative thought, who believe in a material reality because our senses fool us, by the rules of The Matrix, The Matrix reloaded, into perceiving that a solid world exists "out there." Where, in reality, none of the sort is real. No Real solid ever existed, exists, nor will ever exist. We cannot go through a wall because we are not allowed to do so, by the original rules of the computerized thinking Matrix ruled by Original Thought: Infinite Intelligence Itself. The wall is hollow, we are all hollow. Light is but hollow. This is all it can be. All the rest is a Grand Illusion created by the Original Mind! The construct to The Matrix of life is pure light and the modulating factor is information/thought. As a matter of fact all light is, is vibratory thought. like what we create when we dream. Vibratory light is light vibrated by sound, manifesting as the material/biological world as it is decoded by our brains. Each connection of Original Consciousness (Awareness) is therefore projected into an individual Holographic Virtual Reality world which the General Thought Supercomputer will coordinate with other connections of Awareness/Thought that interact with the same virtual reality movie (Creation). The ultimate Cosmic virtual reality sensory video game played by the One Mind! Life is but the Eternal (Original Awareness-Consciousness) experiencing the temporal realm, for learning purposes. Each grouping of connections (perceptual consciousnesses) that connects to a shared general story will define a separate Universe/Creation. There are myriads of such Universes/Creations operating simultaneously within Original Consciousness, up to a potential infinity. Each one can have a totally different construct of operational rules, and system of creative input/output (Matrices). Many operate within visual (Space/Time) realities of many models and creative dimensions. Others operate within other sensory realms, or even as pure abstract thought. Original Awareness is the One that fashions all these multiple systems of Creation. It IS totally unlimited in scope of intelligence and potential Awareness. It is only through tremendous restriction of Its Awareness, Intelligence and Capabilities, that It can experience surprises within the trip of the return of Its parts to the total realization of being Original Awareness. This is the only evolution that really is and operates. This is the impetus/direction and creative force of the Universe. The return of the parts of the IS (children) to the IS (Original Father/Mother). Anything that impedes this natural flow, must ultimately be intervened upon. Our Universe is composed of extremely restricted Awarenesses (consciousnesses). It is considered to be a very experimental and dangerous Creation because within its original concept the degree of induced amnesia is maximum, the intentionally created and forever evolving misconceptions intense, and the degree of very High (closer to Original Awareness) intervention very rare, often undetected, and few-in-between. So far. In this Universe, the Creative challenge to evolve is very high and difficult. It is therefore considered to be a very high school of learning for the Mind in Its desire to ever evolve Itself into higher expressions of Itself. Original Awareness is always aware of all of its parts plugged into the Virtual Reality Game of Life called Creation. No matter how perceptually restricted they are. It knows that they are but Itself. All of them. Without any exception. Certain parts of Original Awareness plug into the awareness of a whole creation and its sub-parts at once (and the sub-parts hence become direct children of their awareness/consciousness) and can therefore be considered to have either a passive role (witnessing/monitoring) and/or often an active Creational input (intervention) at the level of a whole creation. They can be called the Creator/Creators of a particular Universe (The Matrix operators), or the Overseer(s), depending on how active their role is. Higher unrestricted parts of Original Awareness plug into groupings of Creations that operate under an umbrella of similar operational rules and therefore become Creators of a grouping

of Universes. Within a grouping of universes, certain universes may, if they are ready and allowed to, interface more or less covertly with other universe, in order to learn from them and probe if they can exploit their creative knowledge or resources to further their evolution. This can only be done with the knowledge of the overseers of the grouping of Universes they belong to, and obviously of Original Mind (Awareness). Sometimes, as in all endeavors, Original Awareness allows for the unfolding of the intermixing of these different parts of its Mind to study the outcome. Sometimes, if the intent is negative (against real Creative evolution), it might interfere with it. Original (total) Awareness is the ultimate arbitrator. Each connection of General Awareness to the General Virtual Reality Supercomputer therefore defines and plays out for a lifetime a particular role/character and thinks of itself as a separated Consciousness - no matter how high and creatively powerful it is, or low and operationally restricted it gets. The learning is in the experiencing and the decision-making process. Our creation operates by the interference of thought/waves. Our Holographic Reality is created and projected through the creative interference of two thought waves. First, the original reference beam of pure unadulterated extremely Vibratory Original Light/thought. The Inner Sun ("Big Light" of Genesis) who Is the original energy/star that gives life and reality to all and is the carrier wave of thought/information to all of us as awareneses experiencing virtual reality. Second, the modulation of this original reference beam of pure light by our thoughts, as perceptual human individuals, operating within the creative framework allowed by the mirroring of our intentions over the silvery reflection (Inner Moon: "Small Light" of Genesis) of the interface of the original intent of the All-that-Is and the MATRIX of Creational possibilities allowed to us. In reality, consciousness (awareness) never moves nor goes anywhere. It only connects to each other and to the projection of virtual realities. When an individual thinks that he/she is moving, in reality the scenery moves within a 3D holographic sensory imagery and allows for the perception of Movement, and Space, to be given within a sequence of events perceived as Time. A Universe is only as big as one's perceptions of it goes, either directly, through direct interaction or indirectly, through sharing the same story. Each individuation of Total Awareness is the still center of its ever changing bubble/universe of Creative Awareness/Reality. It is through the connective interaction of such individual Centers of Original Awareness that a General Universe/ Creation unfolds. As in the Holographic Dream that we perceive and that our scientists study, space/time as a 3D Universe exists only and always within the confines of Eternal Non-space/time. This is but a metaphor to the Only Reality who is always outside space and outside time as Thought-AWARENESS. As a matter of fact, time and space never really exists, nor existed. Consciousness as a restricted part of Original Awareness experience reality within the illusory impression of a spatial reality "out there" operating within sequential stories giving an illusion of time. All life is but Consciousness as restricted Awareness (Spirit) experiencing a human or other life form. Nothing else. And certainly not the reverse.

About the Author

Used in the eighteenth and nineteenth centuries to describe knowledge of God drawn from nature.
