

Flying Stars Feng Shui for 2007 : Predictions & Remedies for Main Door Facing South West

Flying Stars or Fei Xing is a powerful form of Feng Shui derived from the famous Xuan Kong Fengshui. It is an Analysis of the Five Elements and Star Combinations (representing certain energy patterns) that occupy every building. Each new year these annual stars change, Qi (energy) shifts happen, bringing good and bad energy with them - thereby producing different effects. In February 2004 all the Feng Shui Energy Patterns underwent huge transformations to the New Age of Land Luck called Period 8 Energy Cycles. It means that a large scale evolution of the human race with completely new energy dynamics has started. The significance is that the new, vibrant energies of Period 8 impacts on the buildings differently than before and energies that were previously activated now need to be remedied, in order to reduce any bad effects from the past influences. The Flying Stars Chart or the 9-Grid Meteor Plan for the Ding-Hai, Year of the Female Yin Red Fire Pig or Boar has been plotted and the effects of their energy patterns are analyzed. The analysis also contains suggested remedies/cures for reducing the impact of negative energy and recommended enhancers for increasing and improving upon the beneficial energy of the year. For the remedies/enhancers to be effective, they should be cleansed, energised, blessed and programmed not only for the particular individual/family but also for the specific purpose/problem. They should also be placed in the indicated location. The direction in which your main door lies is very important to any form of Geomancy, including Feng Shui & Vaastu Shashtra. The primary reason for this is that the air currents and energy flow in and flow out through the mouth of the main door. Thus you receive positive energy for the year, if the main door faces a direction of auspicious stars or meteors (powerful energy bodies) and receive negative energy for the year, if the main door faces a direction of evil stars or meteors. In case negative impacts are forecast, you can simply offset the negative energy by installing the recommended remedies there. Any or all of these remedies can be reused for the coming years, the only thing is that they should be repositioned according to the new year. Please note that the effects may be felt in varying degrees depending upon the exact compass degree of the main door.
