Underground Hypnosis-Dangerous indeed! Must Read before buying!

Underground Hypnosis-Dangerous Indeed! Must read before buying! By a certified hypnotherapist It seems like everywhere I look online I am seeing this new ebook for sale. The sales letter starts out this way- These Are The Covert Hypnosis Tactics Leaked By THE UNDERGROUND. "The Astonishing Secrets Of The Most Respected ...Most Knowledgeable ...And Most Dangerous Hypnotist In The World!" The letter goes on to say that the techniques are a secret (of course) and that this release of secret info has the hypnosis community in an uproar. Really? I hadn't noticed. I spoke with six of my colleagues, and none of them had even heard about this book or even any rumors of "secret" techniques. That does NOT mean they don't exist I'm just saying that even we highly trained and experienced hypnotists don't know about this stuff. I have seen some really "powerful" stuff done with hypnosis and NLP, but I'm not sure about this blatant mind control stuff. Here's some more of the letter-you decide. Here's a small sample of what you'll uncover: · Never wait in line again for anything. How to use group hypnosis and make people insist on letting you go first. · Learn how some hypnotists make as much as $15,000 EVERY NIGHT! (You'll be surprised when you find out how!) · How you can use MASS HYPNOSIS to get huge groups of people to do what you want (these are the same strategies filthy rich T.V. evangelists pay through the nose to master.) · How to hypnotize your way out of any situation. · How to magically fall asleep with NO trouble. · Finally the art of making GOBS of money with hypnosis is revealed. Not only with stage shows, but in YOUR job right now... regardless of what profession! · Discover how to use your "internal clock" with hypnosis. Imagine NEVER missing an appointment again... or waking up at ANY time you want without an alarm clock. · A revealing look at instant hypnosis, and how you can easily preplant triggers to make people do what you want ... when you want ... AT WILL! · How to bring someone out of a trance instantly, exactly when you choose. · How to utilize MASS HYPNOSIS. Imagine hypnotizing not only 100's of people... but even THOUSANDS at time (Here's a hint, people do it EVERY DAY). · How to use these techniques even in the most straining conditions. Never be vulnerable in ANY situation. (can you imagine never again thinking "I should have said THIS"!) · How to magically get someone to agree with you JUST through body language (Another hint... watch their eyes VERY closely). · How to use hypnosis with people NEVER knowing. ...And much, much more. TRUE? I dont know. I just am sure that myself and my hypnotist friends were never taught any of this secret stuff. I have seen some amazing results from hypnosis, like the guy who had smoked 3 packs of cigarettes a day for over 20 years leave my office and never smoke or even want another cigarette again. He'd tried the "patch" the gum and the inhalers to no avail. One two hour session and he's done! I see this type of thing all the time with smoking and weight loss. Oh! And even though it works so well that I offer a lifetime guarantee, some clients (app 2 %) don't respond as well. Some struggle,some it has NO effect. I wonder if that's not the case with the techniques you'd find in the "Underground Hypnosis Book" as well?

About the Author
