

## Witnesses testify on scandal

Vaught when he asked him for \$20,000 of the \$40,000 he thought Vaught stole. Vaught said he did not believe Adams was joking, although he went along with him on one of the tapes to draw Adams into conversation.

Adams, wearing a dark blue suit and tie, appeared in court but did not testify. He was supported by at least a dozen of his family and friends.

Keaton said he had not heard rumors except those that surrounded Vaught when he resigned in 2005 after a drug dealer, whom Vaught had been allowing to use a house to receive ketamine, was arrested. Neither had other deputies whom Keaton asked about it.

Later, he said, Adams told Keaton that Vaught wanted to meet him (Adams) at a Liberty Street convenience store.

Adams.

Adams came back after the late January 2006 meeting, Keaton said, and reported only that he did not think Vaught had been wearing a wire and that Vaught told him his situation with the Drug Enforcement Agency had been resolved. Keaton said he took that to mean that perhaps Vaught had done the right thing and talked to the DEA about whatever he knew that led to his resignation.

When Adams had another conversation with Vaught that January and told Keaton that Vaught had offered him a \$1,000 bribe, Keaton ordered Adams to stop communicating with Vaught, he said.

Adams had provided tips on law enforcement activities to drug dealer Calvin Rayfield Moore in exchange for cash. Moore died in a car wreck Nov. 3, and Grimes tried unsuccessfully to have evidence related to him excluded.

Wilbert Brown testified he was involved in helping Vaught sell a kilo of cocaine.

Moore and would have drinks and play cards with him. However, Thomas said, he also suspected Moore sold drugs. At one point, Adams told Thomas he and former state probation officer Carlton Arnez Riley planned to play cards with Moore, but Thomas told Adams not to because of the drug suspicions against Moore, Thomas testified.

Adams, Riley and Moore together at least once, and saw Moore bribe Adams.

Dudley, who was seriously injured in the crash that killed Moore, responded to a challenge to her testimony by saying that she was testifying because she loved Moore and because he could not testify because he is dead.

She testified that in the summer of 2003, she and Moore met at a local hotel as part of their affair.

Dudley was taking for her injuries could have left her confused. However, Assistant U.S. Attorney Tom Bondurant argued that since Dudley rarely takes the medicine now, she should not have been confused in court Wednesday.

Riley, a former state probation officer, has pleaded guilty to attempting to buy a kilo of cocaine from Moore in connection with the corruption case.

Grimes called him as a defense witness, and Riley denied ever being in the hotel room or another residence with Adams and Moore.

However, Bondurant began aggressively asking Riley about his previous dealings with Moore.

Working with authorities, Moore called Riley, Bondurant alleged, and offered him a kilo to distribute. When the fake cocaine was transferred, the police showed up to arrest Riley and a car chase began.

Riley agreed that if he had signed a statement after his arrest saying he had previously bought two kilos from Moore, it was probably true. However, he said he could not remember if those previous transactions happened.

The trial resumes at 9 a.m. today. Former Henry County sheriff Frank Cassell is expected to testify before the trial ends.

Cassell pleaded guilty to lying to a federal agent and was expected to begin an eight-month sentence Tuesday, but according to the U.S.

Shanghai Medical College (base) of the Shanghai Institute of Family Planning Science-Research Institute of East China Hospital

Shanghai Medical College (basic)

China's first batch of doctoral and master's degrees awarded points. Existing professor 4 (Ministry of Education Cheung Kong Scholars Program ad hoc professors 1), Associate Professor 2.n

In recent years major scientific research achievements:

Assume a major state scientific research projects including 973 projects significant brain function and brain diseases basic research and the spirit of the biology of substance dependence and control two, the National Natural Science Foundation two key projects, the state Outstanding Young Persons of a science fund projects, the National Natural Science - the surface of the project, the Ministry of Education and scientific research projects in Shanghai, Shanghai Shuguang outstanding academic leaders and talented people such as a number of scientific research projects were funded more than 700 million. Part of the research work of the international leading research progress in the internationally renowned SCI academic journals published research papers more than 50 articles, including several papers published in the professional journal Molecular Pharmacology international authority and the relevant professional authoritative international magazine Journal of Biological Chemistry, and other leading publications. In recent years published papers in the United States Pharmacology Yearbook and Pharmacology comment was repeatedly invoked, SCI publications have been cited 500 times over. Research results obtained first prize for scientific and technological progress the Ministry of Education, Science and Technology of China won the first prize of Medicine, the scientific and technological progress of Shanghai won the first prize, second prize in the State Natural Science.n

Science and Technology Award, and was an outstanding young scholars Award, Peony Shanghai Natural Science Award, the national outstanding PhD thesis guidance teachers, outstanding educators in Shanghai, Shanghai teaching instructors, tutors and other school honor outstanding graduate students.

Creation of the major professional courses:

Pharmacology, Pharmacology forefront of the idea of scientific research papers, wrote and published the forefront of biomedical literature discussion forefront of biomedical literature, such as intensive reading.

Graduates whereabouts:

In the well-known Chinese and foreign research institutes and universities engaged in research, teaching or continuing their education; In the world of biotechnology or pharmaceutical companies engaged in the research, development or management.

College of Pharmacy

Points awarded a master's degree and doctorate. Shanghai, the top priority, an important component of the department of pharmacology. Existing Professor four people, Associate Professor five.n

In recent years major scientific research projects:

The process of drug metabolism in vivo studies; Adverse Drug Reaction Monitoring; Myocardial cell electrophysiology; Autoimmune conditioning dose; New anti-aging experimental animal model of the establishment and application of molecular pharmacology of heart.

Creation of the major professional courses:

Introduction of chemical, pharmacological experimental design and data analysis, molecular pharmacology, immunization pharmacology, molecular

pharmacology nerve, ion channel pharmacology.

Graduates main destination:

Institutions of higher learning, scientific research institutes, hospitals, and other related pharmaceutical industry.

Shanghai Institute of Family Planning Science

Master s degrees awarded points. Existing research fellow at the 4, an associate research fellow at three.n

Major research projects, topics and results:

Anti-progesterone for emergency contraception, luteal phase contraception and pregnancy only reminder of the series of tests, clinical implantation, anti-implantation mechanism studies; Male hormone contraceptive methods clinical pharmacology studies; Human reproductive control cell and molecular biology of basic research; Prostate molecular biology of precancerous lesions ; the treatment of benign prostatic hyperplasia drug pharmacology and toxicology studies; human reproductive health drug studies.

Mifepristone pharmacokinetics and clinical study of early pregnancy series of second-class national science and technology advancement awards; Mifepristone and prostaglandin introduction of the anti-pregnancy study scientific and technological progress of the State Family Planning Commission the second prize winner; Mifepristone for contraception clinical and basic research by the scientific and technological progress in Shanghai Third Honors; Water pollution is indicative microbiology by the rapid detection of the second prize winner in Shanghai scientific and technological progress.

Creation of the major professional courses:

Introduction and other family planning.

Graduates whereabouts:

In the main scientific research institutes, colleges and universities, hospitals, and other units of work.

Huadong Hospital

Master s degrees awarded points. Existing Professor four people, Associate Professor 2.

The main research direction:

Clinical Pharmacology

Major research projects:

Adverse Drug Reaction Monitoring, Clinical Research on rational drug use

Creation of the major professional courses:

High pharmacology (clinical pharmacology), pharmacokinetics, and so on.

Graduates whereabouts:

Mainly in the hospital, adverse drug reaction monitoring centers, and other units engaged in medical and scientific research work.

## About the Author

From [www.martinsvillebulletin.com](http://www.martinsvillebulletin.com):

The Journal of Pharmacology and Experimental Therapeutics is a publication of the American Society for Pharmacology and Experimental. News on Pharmacology continually updated from thousands of sources.

Electronic drug reference and drug therapy management site. Requires.

Publishes original applications of biochemistry, biophysics, genetics, and molecular biology juxtaposed with innovative pharmacologic research.

Karger is a medical publisher, scientific publisher and biomedical publisher of print and online.

The objectives of the College are to advance the science of clinical pharmacology in all its phases and to engage in appropriate educational.

Molecular Pharmacology is a publication of the American Society for. Molecular Pharmacology Online is published with the assistance.

The journal publishes articles dealing with all aspects of experimental and clinical pharmacology. Papers dealing with mechanistic aspects.
