Manipal University is giving students an added advantage of taking these exams online. The test centres are ergonomically designed with the latest computers for every student, high security communication network for electronic delivery of the test and use of bio-metric and hi-tech monitoring systems to prevent impersonation and foul play. Each computer is fitted with a web camera, which takes an image of the candidate every 20 minutes. Candidates can schedule tests at their own convenience. Those writing other tests will not have any difficulty, since the online test will be held over a period of time and not on a single day, unlike other entrance examinations.

Online entrance examinations for admission to these courses are available online at 19 designated test centres in Ahmedabad, Bangalore, Bhopal, Chandigarh, Chennai, Delhi, Ernakulam, Hyderabad, Jaipur, Kolkata, Lucknow, Manipal, Mangalore, Mumbai, Pune, Bhubaneswar, Coimbatore, Gangtok and Guwahati, added the press release.

According to the State Food and Drug Administration (SFDA) of the new regulations, since December 1, 2005, qualified retail pharmacies. And in the online sale of drugs. The new regulations mean that people can be traded like other commodities, like e-commerce, some of signing the click of a mouse will be sent home for drugs.

But reporters recently searched for a number of pharmacies found that the new requirements should be those few, applauded the appeal. Guangdong Province has yet to apply for a retail pharmacy online sales, is the main reason that online pharmacies, is not its main consumer base.

Pharmacies struggle with the Internet sale of drugs for only 10 per cent of respondents agree

Non-prescription drugs can be sold online

Drugs, as a special commodity, has been allowed online transactions. In fact, drugs and medical equipment in online sales has been secretly carried out.

September 29, 2005, SFDA issued trading services for the Internet drugs approved interim regulations, the formal recognition of the legitimacy of the transaction drugs online. Provided that: the year from December 1, with the corresponding qualifications in the online pharmaceutical companies can sell non-prescription drugs. However, to provide consumers with personal online trading services for the pharmaceutical enterprises can only be sold online this business of non-prescription drugs, but not to other companies or medical institutions selling drugs; should have the corresponding drugs delivery system, a professional pharmacist responsible for the Internet Real-time advisory.

Medicine dealers online. And not a warm

SFDA introduction of the new regulations have been major pharmacies should cheers, but there are more reasons for making online retail medicine dealers. And less enthusiastic.

Jinkang Zhenggaochao general manager of the pharmacy, said to reporters that the Internet will become a traditional pharmacy hospital channels, pharmacy channels after another drug sales mainstream channel, in the long term, perhaps in the future will replace the traditional, mainstream forms of transactions. But at this stage, certainly not immediately profitable. Today will be the Internet because the vast majority of young people, and the focus of pharmacy customer base is in the elderly, many of these people as blind network, for the time being little or no practical significance, but can

be used as pharmacy brand image display platform Secondly, the online pharmacies Drug Administration request for a higher Jinkang had applied, but were returned to request additional information and complete the basic website construction, a relatively high threshold Furthermore, the establishment of online payment function cost more, puerile profit-based model of pharmacies unbearable.

Guangdong people Jiang Xin, general manager of the pharmacy also shared the same view that the target consumer group is not the Internet crowd, and the consumer recognition of online pharmacies is uncertain how high, and there is no policy on the application soon, we are still considering the discretion .

Guangdong Provincial Food and Drug Administration is responsible for circulation told reporters that so far has not yet formally accepted the application for a pharmacy. But reporters noted that there are also the avant-garde of the Internet pharmacy sales have plans to launch video clinics, consumers through home video and microphones, it can get the other pharmacists live Discussion and dispensing.

Legalization to counterfeit the door?

Reporter survey found that the majority of consumers believe that online pharmacies will bring convenience in life, but how to ensure that the quality of on-line drugs, and how to punish violations and other issues have become universal concerns.

To consumers worried that the issue Drug Administration departments, if it is approved in the formal online pharmacy purchasing, through routine inspections, online monitoring, accepted reports and complaints to strengthen management. According to provision in the Internet trading services for pharmaceutical enterprises must review and acceptance in the Internet drug trade services credentials, and at its Home prominent positions their Internet service providers for drug transactions certificate number.

Drug sector is really worried about is that counterfeit sales channels through network burst and Chung. Internet sales because of its inherent concealed, it is easy to avoid monitoring the door. Many enterprises do not have access to pharmaceutical production and State Food and Drug Administration s approval of the text can also secretly crazy online sales, the website is likely to become some fake and shoddy drugs natural safe haven. Legalization , the difficulty of monitoring will be getting higher and higher.

Li Yifei this reporter intern Qinliping

Some online pharmacies today with the opening of non-prescription drugs prescription drugs are sold?

Observer reporter

Macroeconomic policies need for the timely support

Market Oversight Division SFDA a responsible person told the reporter that the current declaration of Yaoqi online pharmacies do not, because these enterprises after the initial excitement, the SFDA found the specific requirements of high returns, but also have to Weiliangdao Hom: 1 China s online payment still a lot of difficulty; Second, the Internet There is a certain risk of selling medicine. For compared to the traditional Chinese medicine industry, online pharmacies is obviously nothing new at the same time, regulators also made big challenge.

State Food and Drug Administration information advertising market Oversight Division Deputy Director---Not long ago the media said that at present Drug Administration departments have the right to the punishment and measures are still limited, and the need for strong collaboration network management departments. Drugs online information and transaction services, the regulatory authorities is a relatively new and complex issues. So far, including some developed countries, the global Internet drug trade regulation seems insufficient.

However, the online pharmacy is an inevitable trend in the development of electronic commerce, is not evade a solution to the problem, the key is the need for the state to further macro-matching policies. With the online sale of drugs to secretly and privately Luangao than incorporated clearly management, but the state-related policies must keep up with a timely manner.
