

Woman injured after tile fell from Letterkenny building

A YOUNG woman had to be treated for back and neck injuries after she was struck by a granite tile that fell from a building in Letterkenny in the early hours of yesterday (Thursday) morning.

She was taken to Letterkenny General Hospital for treatment after the tile from McCarry's Bar struck her around 2-30 am. The High Road from Gallagher's Hotel to Ruth's Chemist was closed off by gardai yesterday morning causing traffic congestion and difficulties for shoppers and businesses in the area.

Speaking to the Donegal News, Garda Inspector Pat O'Donnell said an investigation was underway.

"An architect and engineer are looking at the structure to determine its safety," he said.

"This is really a civil matter," he added.

One local businessman said the closure was causing a lot of inconvenience.

"I wonder was it absolutely necessary to close the High Road. I had to go to two different parts of the town this morning to get papers because delivery vehicles could not get into the area," he said.

An irate local milkman was also forced to carry his deliveries over 200 yards to another shop.

"We understand what's happening but wonder did the road have to be closed at all," he said.

The granite tile fell from a height of six feet before it struck the young woman. The owner of the premises, Mr Hughie McGee, said he was carrying out a full inquiry to find out exactly what happened.

International health centres located in Hangzhou, Zhejiang No. 88 riding two hospitals, the hospital is Zhejiang To meet the rapid economic development of Zhejiang and Hangzhou International Tourism urban construction, high-level people at home and abroad to meet health care needs of the establishment of the medical and health care-in one service centre.

Center for the 17-storey main building alone, the construction area of 20,000 square meters, the building has a total of 10 wards configuration of more than 200 beds, equipped with double, single, double suites, and three suites. Outpatient medical experts have 12 studios and spacious waiting hall.

Center in addition to a comprehensive medical facilities, there are medical Beauty Shop, a gym, oxygen bar and other facilities. She relies on two hospitals in Zhejiang strong technical strength, advanced medical equipment, services involve special needs medical care, health care, rehabilitation, therapeutic and leisure, and so on, to live, food, entertainment stars hotels integrated management model, the specialized for the health care needs of the people at home and abroad and the provision of quality health-care services.

Superscript one night accommodation between meals provided

Medical subjects main content

General height, weight, blood pressure, body temperature, pulse, respiration, such as vision

Surgical skin health, lymphatic system, thyroid, limbs, spine, genitourinary system, refers to the seizure of anorectal

Cardiovascular health medical system, health, nutrition, history, respiratory and abdominal examination

ENT Section nasal pharynx, smell, pharynx, larynx, ears

Eye health astigmatism, colour recognition of the IOP, and corneal disease, fundus

Blood cells automated blood analysis, check abnormal red blood cell morphology, interleukin abnormal morphology inspection

Automated urine routine urine analysis, Niaobichong Determination

Conventional + fecal occult blood stool examination, fecal occult blood test, fecal examination parasites

Glycolipids liver function test cholesterol-quality, direct biliary of red, red bile indirect quality, total protein, albumin, alanine aminotransferase, aspartate aminotransferase, and alkaline phosphatase, r-glutamyl transpeptidase in enzyme choline fat enzyme creatine kinase, lactate dehydrogenase, amylase, serum apolipoprotein A1, serum apolipoprotein B, total bile acid, urea nitrogen, creatinine, uric acid and serum cystatin, total cholesterol, triglycerides Ester, high-density lipoprotein cholesterol, low-density lipoprotein cholesterol, blood sugar

Quantitative HbsAg three of hepatitis B, anti-Hbs, HbeAg, anti-Hbe, Hbc, anti-HbcIgM

AFP, CEA, CA199 and CA724, PSA

Color B-Gandanyi spleen, renal, bladder lose, catheter, prostate

Chest X-ray examination is situated tablets (DR)

Computer 12-lead ECG electrocardiogram

Superscript one night accommodation between meals provided
