Top 5 Wedding Favors and Why

WHAT ARE THE TOP FIVE WEDDING FAVORS AND WHY?

At most weddings, the bride and groom will offer some type of small memento as a note of appreciation to family and friends, more commonly known as wedding favors. As you will discover in this article, the type of favors are widely varied but there are some that are considered better choices than others. Remember, wedding favors do not have to be expensive. In fact, this type of gift can be something homemade. If you want to go all out, that is certainly fine, but it is also not necessary. The focus of the wedding favor is to let people know you are grateful for their assistance with your wedding and/or reception or that you are just honored they showed up. To help you get started, we have provided you with the top five wedding favors.

Food

One of the most popular types of wedding favor is food, simply because most people love to eat. A wonderful option that is easy and inexpensive to make would be to purchase small black favor boxes and then line them with white tissue paper. Place Oreo cookies or dark chocolate covered peanuts inside and then tie the box off with white and red ribbon. Watch everyone enjoy the beautiful box but even more, the delicious goodies inside. This is a very nice choice for both informal and formal weddings.

Flower Plant

The second of the top five wedding favors is a fresh plant or flower seeds. With this, you can get as creative as you want. A couple of ideas that work very nice is placing a miniature plant or cacti in a small terra cotta planter. To make this more personalized, the women (and men) in the wedding party could get together for lunch to embellish the pots with ribbon, craft paint, lace, and so on. You could also choose a simple glass container, add three different seed packages, and punch a hole through the upper corner of all three to tie together with ribbon. These are appreciated because once planted, they are a constant reminder of your cherished event.

Fragrant Soap

For the third of the top five wedding favors, you might also consider fragrant soap or votive candles. For soap, this is a lovely wedding favor to place in hotel rooms of out-of-town guests. You can purchase all of the supplies at local hobby or craft stores and then purchase your fragrant of choice such as lemon grass, watermelon, sandalwood, white ginger, etc. If you prefer, you can purchase pre-made soap or buy glycerin and molds to make your own. As an extra romantic touch, look at mold designs such as wedding bells, hearts, bubble designs.

Candles

Now for the fourth of the top five wedding favors, you can never go wrong with votive candles, enjoyed by both men and women. This type of wedding favor can again be purchased through a hobby or craft store or on the Internet. If you prefer, you can create your own candles, which involves melting wax, adding color and fragrance, and then pouring into approved glass jars. Choose several coordinating colors if you like and for the simple yet elegant glass jars, add decorative touches such as flowers, ribbon, or trinkets attached with hot glue.

Pewter

Finally, the last of the five top wedding favors would be pewter or silver. You will find many wonderful choices such as picture frames, paperweights, and bottle openers. With this type of gift, you will probably pay a little more but this is a nice gift for a more formal wedding, affluent group list, or members of the bridal party. Remember, you can choose from hundreds of wedding favors to include miniature bottles of wine, stationary with last name and wedding date, golf balls and tees for the sports enthusiasts, and the list goes on and on. Whether you go with bubbles to be blown as you and your new spouse leave the church to creative miniature baskets filled with candles, candy or Jordon's almonds and everything in between, the key is to choose wedding favors that coordinate with your wedding but that are also special for your type of guest list.
